Sheep & Lamb Marketings & Value.....	10
Sheep survey.....	9
Swine Survey.....	8
Wheat area production & value.....	5

## PREFACE

These statistics were compiled for the purpose of having concrete information available in a simple form; the census division being used as a definite unit when comparing values within various districts throughout the province.

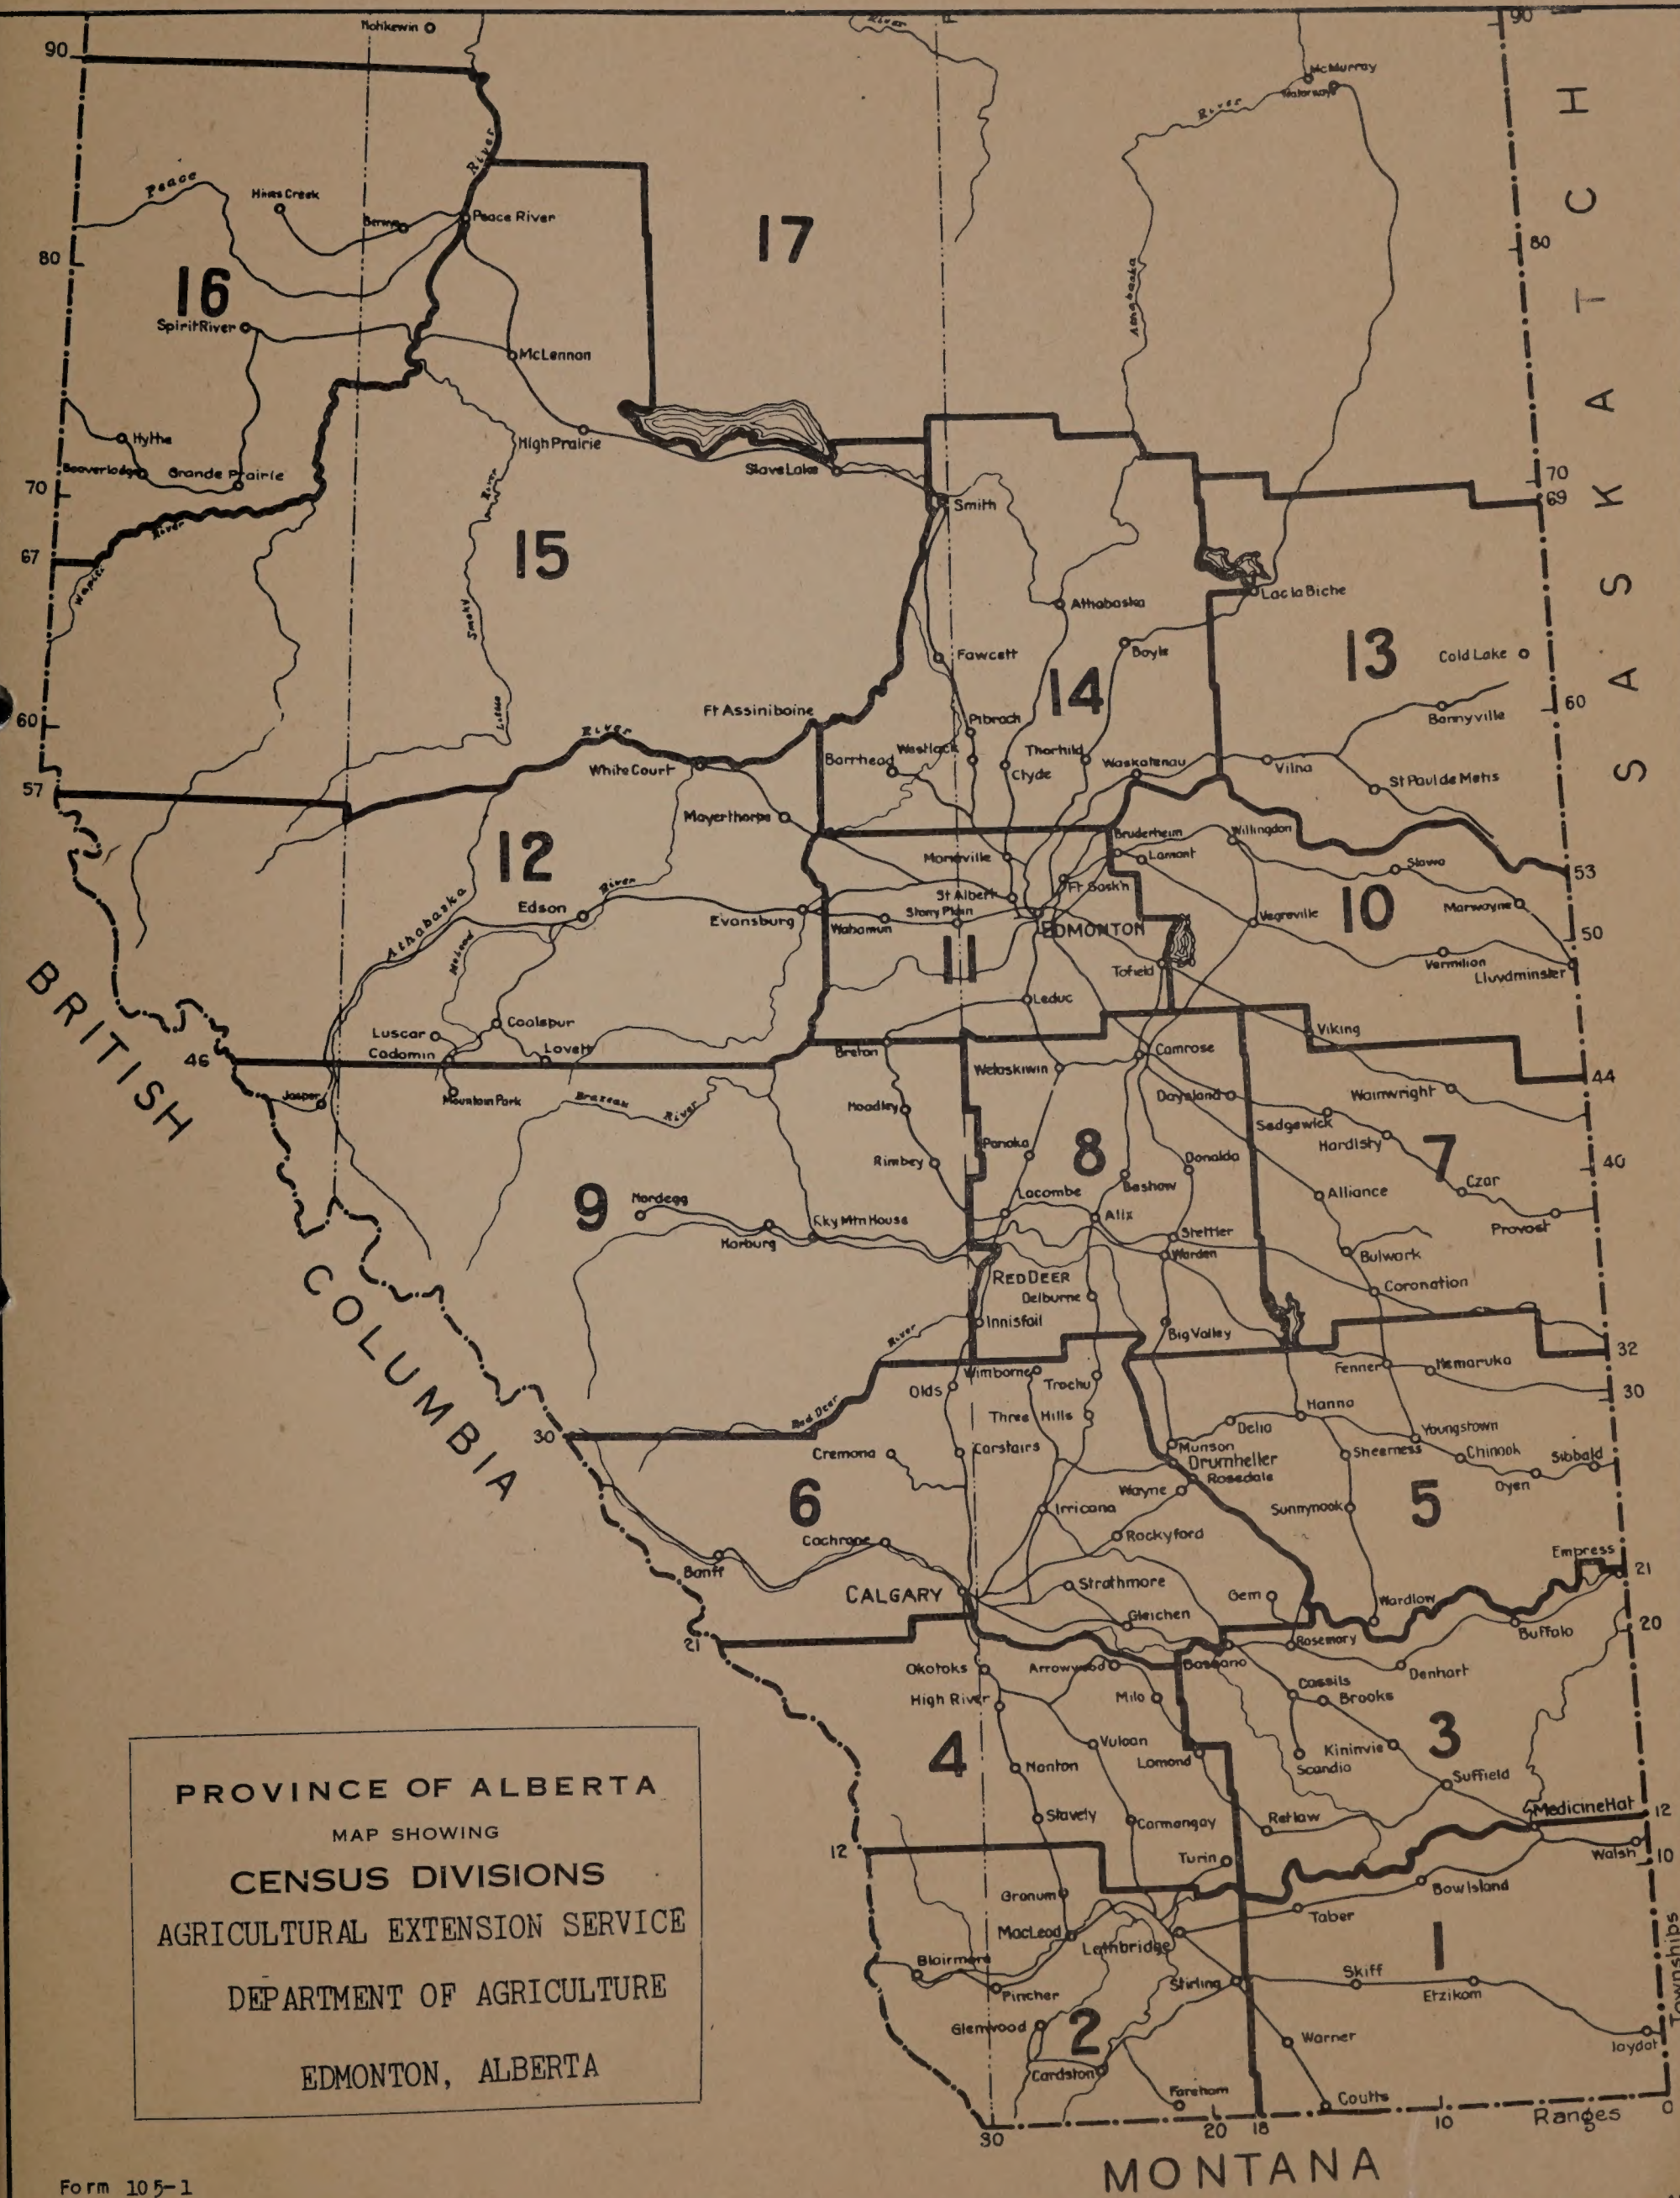

In the past some statistics were shown by census divisions, others were shown by districts and some by the total for the province.

Some statistics are not yet available by census divisions, but it is our hope that we can arrange for all future statistics to be compiled by census divisions, in order that we shall be in a better position to make a clear analysis of the situation, when future development programmes are being considered.

DOMINION BUREAU OF STATISTICS  
Prairie Provinces Census 1946

Table 2. - Population by marital status and sex,  
for census divisions, rural and urban, 1946.

1. The first part of the document discusses the importance of maintaining accurate records.

2. It is essential to ensure that all data is entered correctly and consistently.

3. The second part of the document outlines the procedures for data collection.

4. This section describes the methods used to gather information from various sources.

5. The third part of the document details the analysis of the collected data.

6. It explains how the data is processed and interpreted to draw meaningful conclusions.

7. The final part of the document provides a summary of the findings and recommendations.
